

## **Mr. Debasis Roy**

After completing his academic career in physics from university of Calcutta, he chased down his dream of becoming a sound engineer by enrolling his name at Film and Television Institute of India (Pune). With his sight keenly set upon a career in audio industry, he enriched his knowledge by attending in a special workshop in SSL (Solid State Logic) mixer held by ISRO (Indian Space research Organization). Mr. Roy's famed engineering career at H.M.V (Kolkata), which has spanned a seventeen years period has allowed him to work with many of the finest artists, musicians and producers. The prestigious music album "Tagore in Symphony" recorded by him was an international release at that time. His innovative and skillful work of restoring defective audio tracks from old celluloid and 78 rpm records has been highly admired. His passion and way of approach to the audio industry have already made him a stalwart.
